TITAN

More Than Just a Chair.

It Moves.

Assistance Provided:
Casual

An early sign associated with mobility loss is required cane use. While daily caregiver assistance is unnecessary, residents may appreciate some gentle assistance to sit at a table. **The Titan with mobility assist** feature is useful here.

It Moves, It Swivels.

Assistance Provided:
Routine

When a rollator or walker is required for mobility, it becomes cumbersome to get seated at a table. The **Titan Swivel** feature allows the person to transition easily into a chair, then to be moved forward by a caregiver.

It Rolls, It Locks.

Assistance Provided:
Continuous

A person's physical size may warrant additional care and assistance. By adding a full set of casters to the chair, even a full-sized patient can be easily seated and moved forward by a caregiver. **The Titan with bariatric locking casters** can help!

Ideally, residents arrive at a facility mobile and independent. They may have access to a vehicle, go on day trips, take walks, and have the strength and coordination to seat themselves at a table. The **Standard Titan** chair is well suited for this application. Optional front wheel assembly provides minimal assistance.
