

Titan Swivel - 22"

TESTIMONIALS

“ After countless hours of searching for a swivel chair, with arms, and no wheels, that wasn’t an office or patio/lawn chair, I found this. It is such a great help to my mother, who has Parkinson’s. She can now safely sit, and turn herself toward the table, without trying to maneuver and stumble around her walker. The arms help stabilize her when she stands. The swivel function locks for stability and safety. ”

“ This chair is absolutely great. It is very well made, it is very heavy and substantial and steady. We bought it for my handicapped father so he wouldn’t have to twist around in his chair and it is absolutely wonderful! He loves it!! ”

Michele - Oxford, MA

“ I purchased this for my father who walks with aid from a rollator and has a lot of mobility issues, especially getting up/down. We needed a solid, strong and usable chair for his dressing area that he could easily sit and stand from. The higher seat (about 21-22 inches from the floor) allows for an easier sit from standing position. The chair is comfortable and the swivel lever is easy to use to help turn from side to side to get things without leaning dangerously. The arms are nice and sturdy. This is perfect for him. It will really help to minimize falls in his bedroom.

Thank you for making such a product! ”
