

BFL-4(4/1) | BFL-4(2/2)

TESTIMONIALS

“ We had a gentleman, 6’2”, sitting at a table with a lady barely 5’ tall. Both, were struggling to eat on their own as the height of the table was not suitable for either of them. With the Butterfly Table (BFL-4(4/1)) we were able to adjust the height of each table top to their specific need...further enhancing their independence. “

“ Thank you so much. I wanted to share with you the comments that we have gotten back on these tables. “We love them” said our residents. “I am so happy that I can reach my food” said another resident. We want the manufacturer to know that we love the lazy susan. Our staff has quoted that “it brings back our residents dignity and comfort.” Thank you again so much. “

“ I just wanted to write to tell you how great the butterfly tables are! They are so versatile. Their maneuverability makes it easy to fit everyone in our dining rooms, and allow the residents to dine with dignity. No longer are shorter residents sitting with the table within inches of their chin, and taller residents eating from their laps! When the state surveyors were in our building they LOVED these tables! I am so happy we found you! “
